To Bee-Keeper:

Send us your P. O. address and we will send you (Free) a sample of a new Wrapper that takes the place of Glass on Honey-Sections—is attractive, light looking and consumers do not think about paying for the weight as they do with glass. Costs about 5c. a pound and pays you double and triple the cost in weight, when you sell your honey. The greatest protection to shipping honey as they are so constructed that they keep the Sections from sticking fast to the bottom of the case from honey leaking, as it so commonly does.

HOW TO MEASURE FOR A RING.—Using a strip of heavy writing paper about half an inch wide, take the measure of the finger where the ring is to be worn. When drawn comfortably tight around the finger, the ends of the paper should just meet. Write your name on it, and send it with your order.
